

Targeted, Fast, and Easy Endpoint Collections

Eliminating the gap between legal hold and endpoint collections

With the rise in remote and hybrid work structures, the demand has grown for web-enabled collections from remote custodians and data sources, such as laptops, email servers, and file shares. Traditional collection processes are cumbersome, resource intensive, fraught with risks, and prone to overcollection.

Relativity Collect's X1 integration allows you to easily manage large volumes of endpoint data and quickly identify key issues during litigation, internal investigations, and compliance projects – closing a major gap in the e-discovery process.

With Collect, your team can quickly search across all your unstructured data endpoints with lightning-fast speed and directly upload targeted collections to the safety of RelativityOne's cloud.

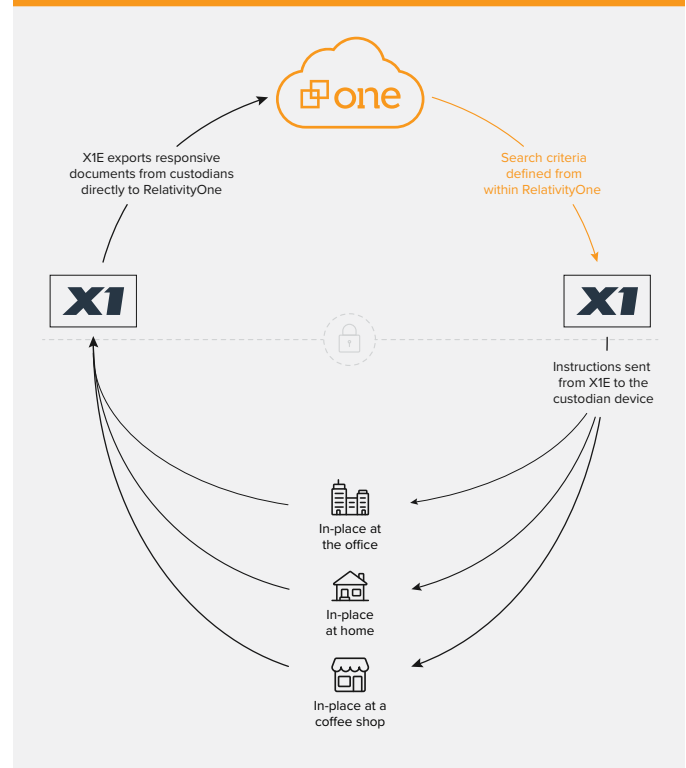

Dramatically speed up time to review from weeks to hours

Traditional endpoint collection workflows could take as long as 30 days to complete. These delays can increase the risk of errors and security vulnerabilities as data is moved between systems and team members rush to get things done. Targeted, automated, and remote collections with X1 and Relativity Collect give you speed to review and defensibility. Now data can be accessed, searched upon, culled, and ingested directly into your review workspace in mere hours.

Save time and costs downstream with quick and targeted collections

There's too much data to capture everything for every matter. Over-collecting means not just increased costs for data storage, but also huge amounts of time wasted on reviewing unnecessary documents. With RelativityOne, you can target and limit collections directly from the source, creating substantial ripple effects to your downstream workflows. You'll not only get documents to your review team in record time – you'll also finish your review faster.

How Collect's integration with X1 Enterprise works

Key Benefits of Collect with X1

One Environment - Kick off seamless end-to-end discovery, all from RelativityOne's user-friendly interface.

Remote Global Collections - Take advantage of remote, targeted collection capabilities with global data centers across jurisdictions. Access and collect from endpoints anywhere.

Immediate Visibility at the Endpoint - Prevent over collection and eliminate the need for cumbersome and expensive ESI processing with a more intuitive and precise user experience.

Speed, Scalability, & Simplicity - Rapidly search across and collect from thousands of endpoints to reduce collection times from weeks to hours. With a few clicks, you can have your data into reviewers' hands.

Risk Reduction - Send critical data directly from custodians straight to your review team. Once it's in RelativityOne, it never needs to leave the security of the cloud.

Collect Where Business Is Done - Relativity Collect currently supports Office 365 and Slack sources. The X1 and Relativity integration enables Collect to also reach emails and files on Macs, Windows, servers, and other network sources.

Real-Time Monitoring - Track, monitor, and report on all your collections in real-time from one dashboard.

Scalable Efficiencies - Add repeatability to your workflow with Collect's wizard-driven interface and customized, reusable templates.

Targeted & Defensible - Use robust filter criteria to only collect the relevant records to save time and reduce data volumes. Perform sound collections with metadata and digital fingerprints of each collected file, detailed reporting, and a complete audit trail.

"The traditional collection workflow is no longer effective. Casting a wide net with custodians spread across multiple locations globally is time-consuming and challenging to say the least. The X1 integration with RelativityOne enables us to efficiently, cost-effectively, and defensively index the data in-place and across multiple custodians, giving us the instant insight we need to effectively search, analyze, and collect the data for immediate review directly in RelativityOne."

About X1

X1 is the global leader in remote preservation and collection software, making enterprise information actionable, in-place wherever it resides, for eDiscovery, GRC and privacy, investigative or productivity purposes. With more than 600,000 users in 20,000 different organizations globally, X1 solutions address our clients' and users' mission-critical needs every day. Please contact X1 at info@x1.com or visit www.x1.com for more information.

About Relativity

At Relativity, we make software to help users organize data, discover the truth, and act on it. Our platform is used by more than 13,000 organizations around the world to manage large volumes of data and quickly identify key issues during litigation, internal investigations, and compliance operations with SaaS platform RelativityOne and Relativity Trace. Relativity has users in 48+ countries from organizations, including the U.S. Department of Justice, and 199 of the Am Law 200. Relativity has been named one of Chicago's Top Workplaces by the Chicago Tribune for 10 consecutive years. Please contact Relativity at sales@relativity.com or visit relativity.com for more information.
